

Briefly describe the attributes setting of the random forest model:

The number of trees: 11

The number of features:17

The number of instances:4001

Briefly describe the difficulty you encountered:

一直粗心，像是寫 loop 時忘記空格，導致數值有錯

種 forest 很花時間，有時結果不如預期，要花大量時間調整 attribute values

Summarize how you solve the difficulty and your reflections:

要一直往上尋找錯誤的地方，下次細心點可以省時間。

讓他慢慢跑，至少 F1-score 有越修越高。
